Manual Communication Bibliography

The following bibliography is a compilation of the more recent works published relevant to manual communication. There are a variety of publications listed, some of which will interest teachers and students of fingerspelling and signs; others which will be of interest primarily to researchers. Entries with older copyrights, and those which are now out of print, are included as research sources.

To enable readers to utilize this bibliography more effectively, each entry is preceded by a symbol (D, R, T, X or *). The symbols designate whether the entry is a dictionary (D), a research source (R), a teaching resource (T), a text (X), or a specialized manual (*).

Prices and sources of texts are listed on the pages immediately following the bibliographical entries.
